Education

Cegep Du Vieux-Montreal – Computer Science ————— 2017
Cegep Du Vieux-Montreal – Photography & Image Editing — 2020
Teccart Institute – Web & Mobile Development ————— 2022

Currently working at

Bathfitter – Saint-Eustache | Web Team Lead

- **Leading and managing a team of developers** while **overseeing web solutions** development and future improvements.
- **Developing actively** with cutting-edge technologies including Builder.io, NextJs, Typescript, React, Headless CMS, and Microservices.
- **Overseeing code quality, progress, and structure** while **documenting internal processes**.
- **Planning and implementing** web solutions architecture and API integrations.
- **Managing team workflow, Sprints, Scrums** and **ensuring best practices** in development processes.

Key Achievements

- **Led the end-to-end replatforming** of bathfitter.com and bainmagique.com, a multi-million dollar enterprise website, overseeing developers and collaborating closely with marketing and design teams.
- **Improved site performance** by **~50%**, **reducing LCP** by **76%**, **Total Blocking Time** by **66%**, and **Cumulative Layout Shift** by **79%**.
- **Enhanced time-to-market and internal workflows** by restructuring development processes and content management approaches.
- **Improved developer velocity, content team autonomy, and time-to-market** for marketing campaigns through flexible Builder.io architecture.

Enterprise Projects

ontheweb.agency – Web Agency Projects :

As the co-founder and lead developer, I manage end-to-end client solutions:

- **Client Collaboration:** Lead communication, project scoping, and contract closure.
- **Tailored Development:** Plan, design, and develop custom websites and web apps aligned with unique business needs.
- **Hosting & Maintenance:** Ensure reliable hosting, ongoing support, and performance monitoring.
- **Marketing & Design:** Design and test HTML email campaigns and digital assets for client outreach.

VitalityToFitness Scheduling App :

Developed a React-based scheduling & client management platform with a Supabase backend, styled-components UI, and FullCalendar.io for dynamic scheduling, personalized notes, and real-time notifications.

WordPress Cloud Migration :

Contributed to transitioning WordPress from a local-hosted to a cloud-based environment, enhancing scalability, content workflows, security, and site performance. Refactoring the codebase for better scalability and web performance.

Bath Fitter Website Migration :

Played a key role in migrating the website from Gatsby 2 to Gatsby 6, refactoring components, modernizing code structure, and improving site performance while maintaining SEO and accessibility standards.

Bath Fitter Web Solution Replatforming & Refresh (Lead) :

Leading the full replatforming and modernization of Bath Fitter's web solutions, transitioning from a legacy system to a headless architecture using Next.js, Builder.io, and microservices. Overseeing project planning, sprint development, UI/UX refinement, and stakeholder alignment while actively developing, reviewing pull requests and safely merging and documenting the projects.

Professional Summary

"Results-driven Full Stack Developer and Web Team Lead with 3+ years of experience delivering enterprise-scale web solutions. Expertise in headless architecture, Agile leadership, and modernizing platforms to enhance UI/UX and drive business outcomes."

Professional Skills

Problem-Solving: Skilled in diagnosing, debugging, and resolving complex issues
Adaptability: Quick to adopt new technologies and industry trends
Logical Thinking: Strong analytical mindset for efficient solutions
Communication: Clear and effective in technical and non-technical settings
Collaboration: Team-oriented, driving projects to successful outcomes
Resilience: Persistent and solution-focused when facing challenges
Sprint Planning & Development | Team Leadership | Project Ownership
Agile & Scrum Methodologies | Cross-Functional Collaboration
